

Interface Manufacturing

Electronics Division

Providing a quality manufacturing service

We are an established company, with many years experience in supplying quality manufactured electronic equipment.

We cater for prototype, small, medium and volume build quantities.

Our facilities include:-

- State of the art manufacturing software
- Material procurement with full traceability
- Assembly of customers free issue material
- PCB assembly
- Hand placement (surface mount and conventional)
- Flow solder lines (Blundell CMS 400 dedicated RoHS compliant)
- Latest Mydata 100 DX Capable of placing 01050
- Mydata surface mount lines (pick and place with inline component testing)
- Horizon 031 Dek Printer
- Reflow oven
- Vapour oven
- ASSCON Systemtechnik vapour oven
- Cropmatic (component lead cropper)
- Yestek A01 (Automated Optical Inspection) Scanner
- Unit and rack wiring
- Quality control and inspection
- Test and calibration

We have an experienced and dedicated team of operators who have the necessary skill sets and flexibility to compliment all of our automated processes.

Finished products are inspected to our exacting standards. We ensure all completed products comply to our customer's latest specifications.

We offer a full test and calibration service using proprietary and customers own dedicated equipment.
