

Based in St Leonards-On-Sea since 1999, Interface Manufacturing Ltd is part of the Interface Group.

The Group offers Electrical & Electronic Manufacturing, Precision Engineering & Sheet metal Fabrication & Powder Coating services as a "one stop shop" for a complete sub contract service.

Interface Manufacturing provides the complete manufacturing solution for prototype or batch manufacturing or all your Electrical and Electronic needs. Our MYCRONIC SMT machine allows accurate component placement coupled with experienced through-hole hand assembly and comprehensive testing enables Interface Manufacturing to ship our customer's product with confidence "first time, every time."

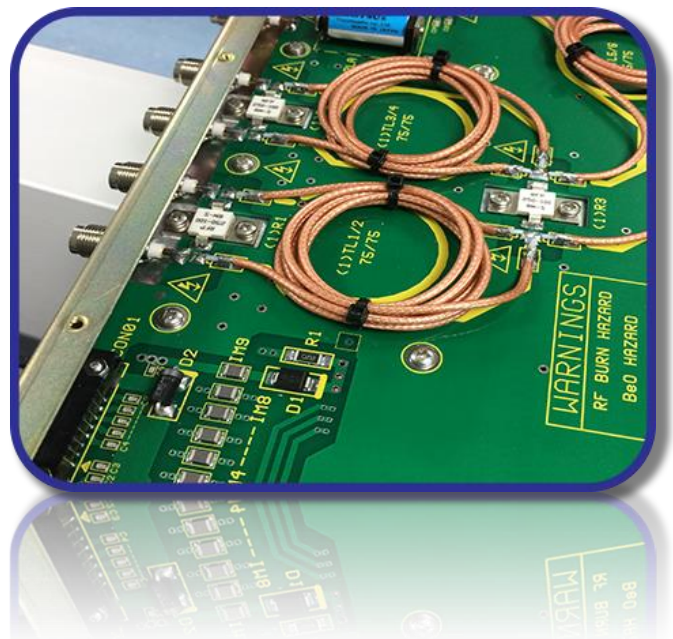

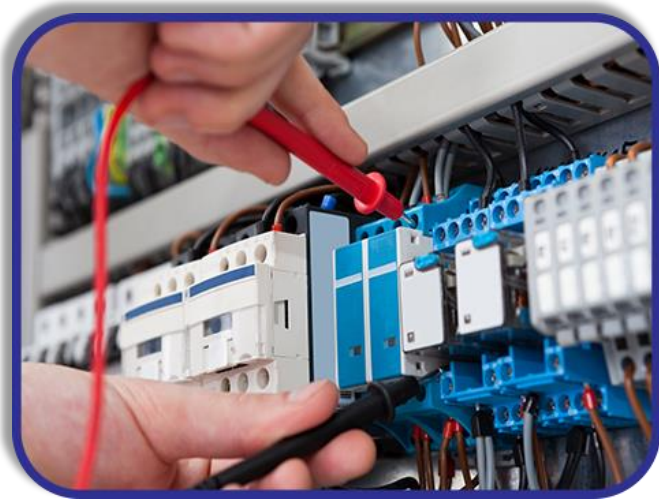

SMT Assembly

Our MYDATA "MY100DX "Pick & Place" SMT machine allows rapid batch change and flexibility and is coupled to an 8 zone BTU Pyramax oven and an EASYVISION, AOI station giving 100% visual inspection of assembled boards quickly to support your FAST TURN prototype, NPI and Batch quantity requirements.

Box Build & System Integration

Our complete manufacturing service from assembled printed circuit board to box build tested & Conformal coated product. Electrical racks, cabinets or fabricated enclosures can be supplied from within the Interface Group to customer drawings.

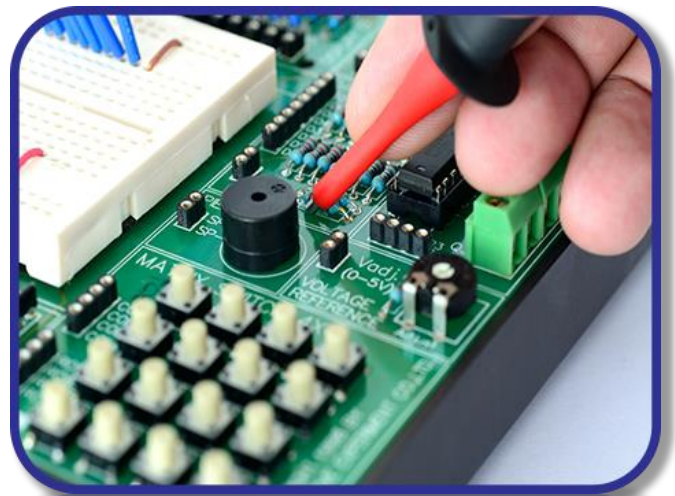

Cable Harness & Cabinet Wiring

Experienced staff can provide complex wire looms or cable harnesses fully tested. Bespoke cabinets, from a simple sketch or multiple cabinets can be "ship to line" or to site, fully tested and serialized.

Material Procurement, Test & Conformal Coating

We provide full procurement of materials. All our products are visually inspected & electrically tested to the customer's specification. Conformal coating if required.

Additional Services

- PCB Schematic Design/Layout
- Hardware Development
- Software Development
- Reverse Engineering
